DETAILED ACTION

Allowable Subject Matter

Claims 6-12 and 17-23 are allowed.

The following is an examiner's statement of reasons for allowance: A thorough and extensive search of both patent and non-patent literature finds that the subject matter of Applicant's invention is distinguishable over the prior art by disclosing a method for increasing food and energy uptake from a livestock feed by livestock comprising administering to the livestock a feed having an effective amount of hop acid capable of decreasing the production of unoxidized carbon sources in a digestive system fluid of the livestock.

The prior art closest to the instantly disclosed invention is taught by Krishna et al. (U), wherein Krishna indicates the nutritive value and beneficial functional antimethanogenic effects of different hop acid containing spent hops when incubated in a rumen simulator. However, Krishna readily states that no attempts were made to determine what factors were responsible for the antimethanogenic activity. Thus, the examiner notes that the prior art does not teach Applicant's disclosed method.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michele Flood whose telephone number is 571-272-0964. The examiner can normally be reached on 7:00 am - 3:30 pm.
